

Listing of the Claims:

1-20. (canceled)

21. (new) A method of integrating a monitor into a multi-display system, the method comprising:

providing a display system having an arm with at least two support members for supporting at least two monitors

providing a monitor having an engagement means screwed into screw holes on the back of the monitor, said engagement means being unsuitable for supporting the monitor on either of the two support members;

removing the engagement means by unscrewing from the screw holes;

screwing a mounting bracket in the screw holes at the rear of the monitor, said mounting bracket being compatible with at least one of the at least two support members; and

mounting the monitor to the arm with the at least one of the support members.
